

BIKE HELMETS!

A great way to prevent unintentional injuries this summer!

Whether you ride your bike, inline skate or scooter for recreation or transportation, you should wear a

helmet. While helmets can't prevent crashes and falls, they do help reduce the risk of head injury and long term brain damage by up to 88%. In fact, if all bicyclists wore helmets, one death could be prevented every day and one head injury would be prevented every four minutes!

**ONLY
\$12.99**

The Minnesota Safety Council and Safe Kids Minnesota are offering you a special bike helmet opportunity. Our helmets meet ASTM, ANSI and CPSC approved safety standards. With their lightweight design and great new styles and colors, you won't find a helmet of this quality at a better price anywhere!

The Minnesota Safety Council will customize an order form that you can distribute to all of your employees to let them purchase helmets for their families.

Or you can buy helmets for all of your employees or safety committee members as a reward for outstanding safety performance.

Thank you for helping to make Minnesota a safer place to live!

For more information on bicycle safety, visit the Minnesota Safety Council at:
<http://www.minnesotasafetycouncil.org/bicycle/>

For a proper fit, carefully measure the circumference of the head about one inch above the eyebrows.

(See back of sheet for order form)
