Active Shooter: Lessons Learned and Updates August 10

This **updated, full-day** [Active Shooter workshop](#) reviews basic concepts and observations while preparing for and responding to active shooter and hostile events. Scenarios will reinforce recognizing suspicious indicators, body language/"tells", possible motive and intent. Actual events and methods of operation will be reviewed. Second half of the day will focus on recommendations and elements for a successful security assessment.

Attendance is limited to 40 participants.

Contact Sheila at 651-228-7319/800-444-9150 or sheila.thao@minnesotasafetycouncil.org for more details or to register.

Invest in Workplace Traffic Safety

A crash on the job can take an employee off the job and cause insurance rates to skyrocket.

Indirect costs (whether the crash occurs on or off the job) include recuperation time, re-staffing, retraining and lost productivity. Provide your workforce with **cost-effective** training by using one of these four options:

- Host a defensive driving program at your location customized to fit your training needs.
- Register employees for a [4-hour](#) or [8-hour](#) course at the Minnesota Safety Council.
- Have your employees complete [online driver training](#).
- Have your onsite trainer attend a [4-hour](#) or [8-hour](#) Defensive Driving Instructor Development course.

Questions? Contact [Lisa Kons](#) at 800-444-9150/651-228-7330.
