Ergonomics: You Have Questions. We Have Answers!

We're getting a lot of questions from members about ergonomics and we have solutions:

- Customized on-site services. We can provide professionals to work on-site with your employees in both **office and industrial settings**. We'll conduct ergonomic workstation evaluations, perform basic audits, make practical, inexpensive recommendations and train all your employees.
- Written program development and/or review and updating. Does your existing ergonomic program need updating? Are you looking to create an ergonomic program? We can help!

To discuss your needs, email gina.hoffman@minnesotasafetycouncil.org.

Are Your Employees Driving Distracted?

April is Distracted Driving Awareness Month, a national observance that provides you with an opportunity to focus on the leading cause of work-related death - traffic crashes.

In Minnesota, driver inattention or distraction is a leading factor in crashes, and nearly 400 law enforcement agencies statewide will conduct extra enforcement April 10-23 in an effort to reduce it.

The Minnesota Network of Employers for Traffic Safety has comprehensive distracted driving resources available for the workplace including template policies, PowerPoint™ presentations, fact sheets, daily e-mail blasts, texting flyers/posters and other [resources](#).

For more information about implementing traffic safety strategies or policies in your workplace, contact Lisa at 651-228-7330 / 800-444-9150; lisa.kons@minnesotasafetycouncil.org.
