April is Distracted Driving Awareness Month: Safe Driving is Serious Business

In Minnesota 1 of 4 traffic crashes and 1 of 5 fatalities involves distracted driving. Motor vehicle crash injuries on and off the job cost employers \$47.4 billion annually. On average, just one on-the-job traffic crash can cost an employer more than \$24,000! Distracted driving is a public health issue that affects us all.

For \$35 or less, you can provide online training in a 90- or 45-minute format that can help change driver's risky behaviors and attitudes associated with cellphone use while driving. The courses offer an engaging, interactive presentation that educate employees about the dangers and consequences of distracted driving.

What Employees Learn:

- Benefits to changing attitudes and driving behaviors of distracted driving
- Science of distracted driving, cognitive distractions and the myths of multitasking
- Personal costs, legal ramification, societal and corporate impact after a distracted driving incident
- Strategies to avoid distractions driving

For more information, or to purchase a program for your employees, contact Lisa Kons at 800-444-9150 ext. 330 / 651-228-7330; lisa.kons@minnesotasafetycouncil.org.
